Introduction:

Advertisement management system project is a complete online solution for advertisers who want to advertise their product on online media or websites. Advertisement Management System project is developed using ASP.NET and SQL server. This project is developed for the users who want to manage their online advertisement from one place. This website is very helpful to advertisement agency staffs and managers to manage advertisements and to view reports.

This project report gives overall system information of the system. Here you can get DFD and ER diagram of the advertisement management system. In this project report we have also explained the different module of advertisement management system. This project report can be used for system design, system development and system testing. It provides information for understanding the system.

An advertiser is the person who wants to display their ads online.

Ad Agency

Ad Agency module are independent Ads Agencies those helps advertiser to make their ads content and are connected with the advertisement management system

Customers

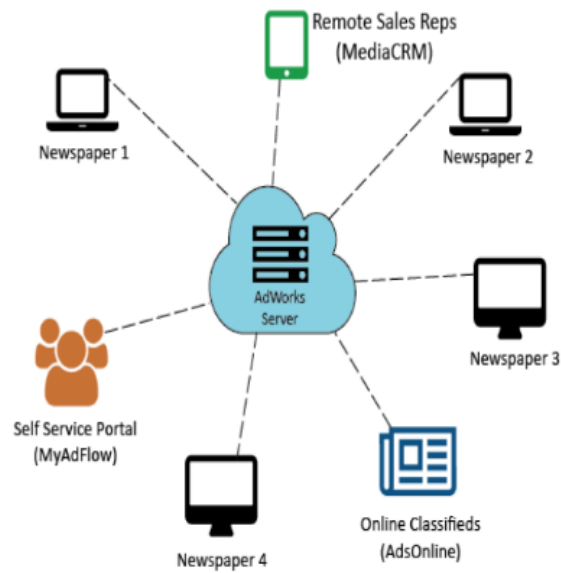

Customers are the Publisher Websites those are connected with the advertisement system and where advertisement will be displayed.

User can make their advertisement with himself or he can also take help of advertisement agency to create ads. After creating ads user can select any Customers from list. Then user select any available plan for advertisement. After completing the payment user's ads will be displayed on Customer's website. User can add as many Customers as he wants from the list.

Software Requirements:-

Front end	Java/J2EE technologies(Servlet, JSP), HTML, CSSS, JDBC
Back end	MySQL.
Middleware/Server	Apache Tomcat v9.0.
IDE:	Eclipse IDE for JAVA EE Developers.
Browser	Best result on Google Chrome.
Operating System	Window XP (Minimum).

ERD (ENTITY RELATIONSHIP DIAGRAM)

Data Dictionary:

create database adpoint;

Table name: consumer

create table customer(name varchar(15), email varchar(30), password varchar(25), mobile varchar(10), city varchar(10));

Table name: agency

create table agency(name varchar(15), email varchar(30), password varchar(25), mobile varchar(10), city varchar(10));

insert into consumer

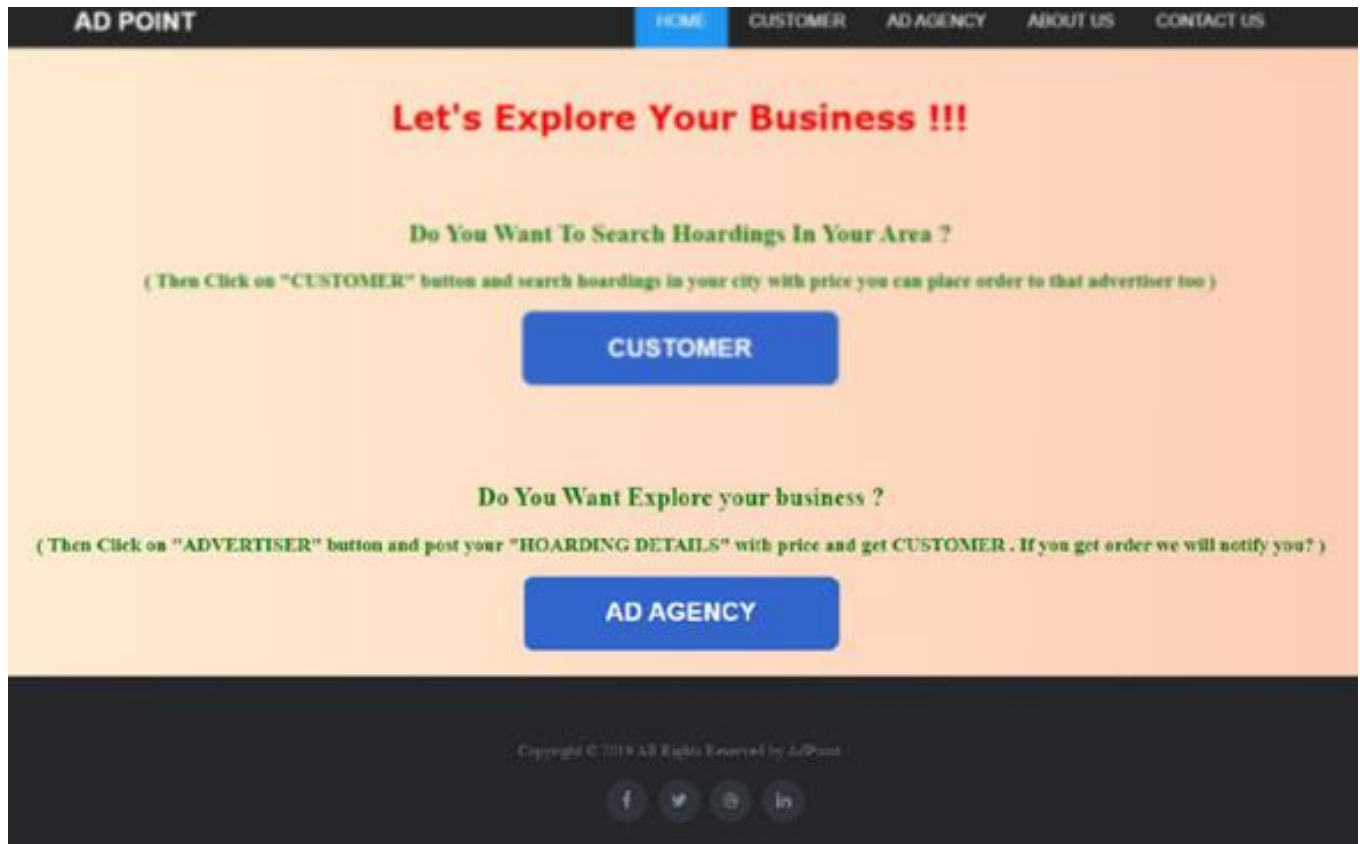

values(chandraprabha,'chandraprabhakeni31@gmail.com', 'pramil@1','9930343344','mumbai');

insert into agency

values(RNKD,'RNKD.rameshHR@gmail.com','ram@1986','9892857749','mumbai');

About us:

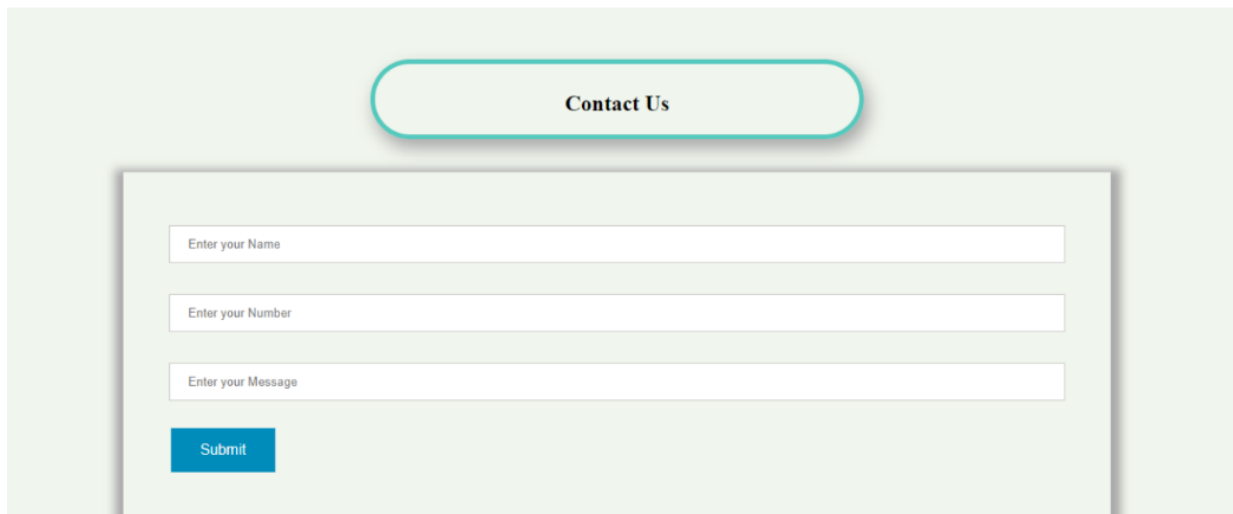

A mockup of an 'About Us' page. It features a light green background. At the top, there is a rounded rectangular button with a teal border and a yellow-to-green gradient shadow, containing the text 'About Us'. Below this, centered on the page, is a white rectangular box with a subtle drop shadow. Inside this box, the text 'Hello Users' is displayed on the first line, and 'Thanks for visit.' is displayed on the second line.

About Us

Hello Users

Thanks for visit.

Contact us:

A mockup of a 'Contact Us' page. It features a light green background. At the top, there is a rounded rectangular button with a teal border and a yellow-to-green gradient shadow, containing the text 'Contact Us'. Below this, centered on the page, is a white rectangular box with a subtle drop shadow. Inside this box, there are three input fields stacked vertically. The first field is labeled 'Enter your Name', the second 'Enter your Number', and the third 'Enter your Message'. Below these fields is a blue rectangular button with the text 'Submit' in white.

Objective

Now a day's people are purchasing products online. Therefore, it is necessary for the company to advertise their product online. Online advertising is a very complicated task we need a system to manage it.

Advertisement management system helps to manage online advertising. This system provides the complete service for advertiser to introduce their products and services into online market. Advertisement management system will give the solution of all problems that comes in online marketing. In this system user can create ads and can also select website where he want to show their ads online.

Advertisement system has following plans for users

3 month

6 month

1 year

System will provide the list of subscriber websites for user. System will provide login and profile facility for user where advertisement can be added or deleted or updated. Advertisement management system will make use of online payment system for receiving payment from user. User Manual will be provided for user help.

System design

These are the modules (Web Page) used in AMS.

- **Home**

Home page is the first page of the website. When user go the website of advertisement management system this is the first page that will display to user.

- **Login**

A login is a set of credentials used to authenticate a user. Most often, these consist of a username and password. A security measure designed to prevent unauthorized access to confidential data.

- **Sign up**

Sign up is record the arrival of another or oneself by signing a register.

- **About us**

Communicate the story of our business and why we started it.

Describe the customers or the cause that your business serves.

- **Contact us**

Contact information for contact for business purpose. Ex. Name, Mobile number, Message.
